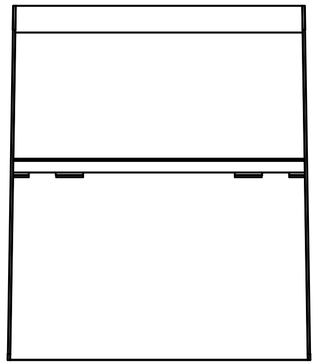
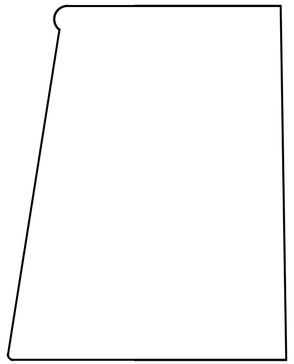
Klein Lounge Chair

Klein is a compact, lightweight lounge chair designed for hospitality. It is made with 304 stainless steel tubing. The specially designed joints blend in the transition from the base to the upholstered seat and back. All parts are connected with hidden set-screws to make it look like one piece. The fabric from Maharam brightens up the design and has life-long durability. Klein chair aims to provide a comfortable sitting scenario. The chair holds you in a relaxed gesture, and the back gives you a bouncy support. The simple yet elegant design brings a modern feel to any space.

(Shown above is the first testing prototype, the final prototype is work in progress due to the Covid lockdown in China)

Piclo

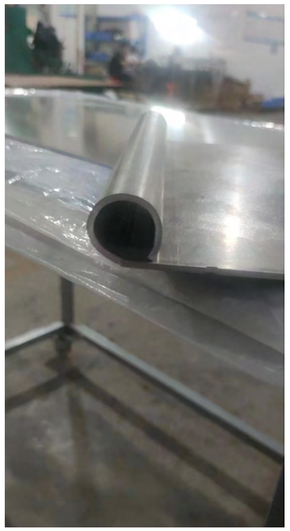


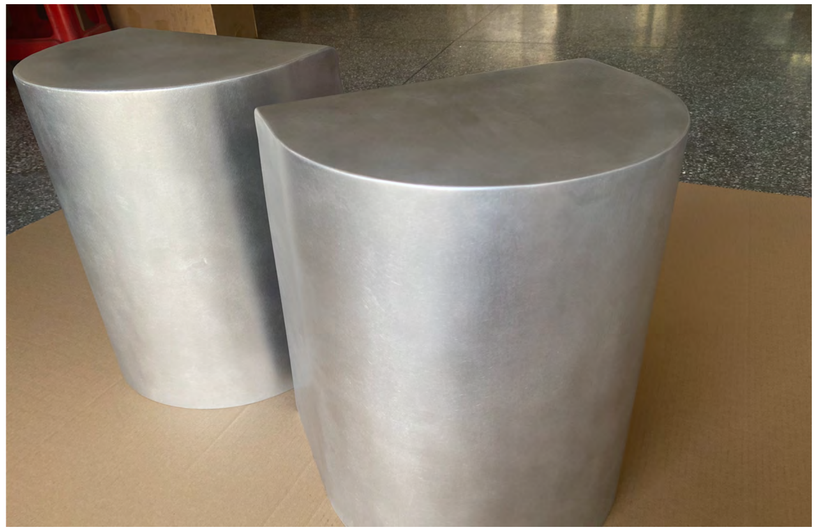


Dimensions

H 17" W 14.5" L 13.4"
Seat Width 14"
Slot Height 9.1"

CMF Options

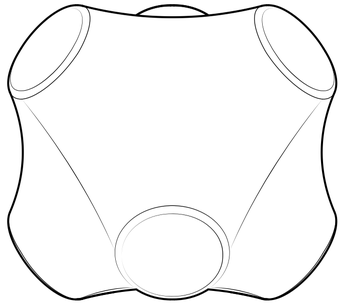


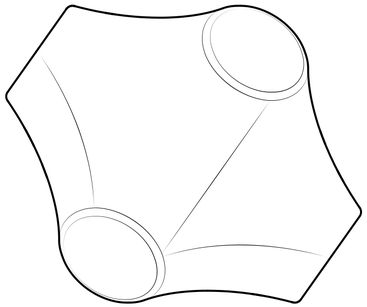


Piclo Stackable Stool

Piclo is designed to be simple yet practical and can be manufactured with minimum material. Hand welded with 5052 aluminum to enforce structural strength and minimize the weight. Its side is tapered with a barely noticeable angle, which allows it to be stacked. The round bar on the top provides a comfortable gripping point as well to enhance visual thickness.

Dolo





Dimensions

H 16.5" W 18.4" L 19.8"

DOLO Sculptural Furniture Piece

With the concept of making a non-furniture furniture piece in mind, the DOLO was born. DOLO is an undefined furniture piece that people can use in any way they want. DOLO aims to create more interactions and topics. Its simple form has endless possibilities. Made with polystyrene foam and coated with fiberglass, DOLO is extremely lightweight and strong. This project allows us to rethink what is the furniture piece we need and the relationship between us and our furniture.
