

About me

I am an industrial designer based in Pasadena, California, specializing in product, furniture, and lighting design. I hold a Bachelor of Science in Product Design and a Master of Science in Furniture, Lighting, and Fixture Design from ArtCenter College of Design. I currently work at WET Design while maintaining an independent design practice. My work has been recognized with international awards including the iF Design Award, Red Dot Design Award, and IDA.

My work explores the relationship between people and objects, seeking a balance between function and emotion through structural clarity, material honesty, and a restrained design language. I aim to create products and experiences that foster meaningful and lasting connections.
